Aims and Scope

The Turkish Journal of Anaesthesiology and Reanimation (Turk J Anaesthesiol Reanim) is the open access, online-only, and scientific publication organ of the Turkish Society of Anaesthesiology and Reanimation. The journal is published in accordance with independent, unbiased, and double-blind peer review principles. The journal is published bimonthly, in February, April, June, August, October, and December.

The publication language of the Turkish Journal of Anaesthesiology and Reanimation is English, and the journal requires UK spelling. When preparing their manuscript, authors should use British spellings throughout. However, the journal welcomes manuscripts both in Turkish and English for evaluation; however authors of articles written in Turkish are required to provide the journal with the English version of their accepted article prior to publication.

The aim of the journal is to contribute to the literature and field of anaesthesiology by publishing clinical and experimental research articles, case reports, letters to the editor, study protocols, and scientific conference proceedings that are prepared in accordance with the ethical guidelines in the fields of anaesthesiology, intensive care, and pain therapy. As of 2022, Turkish Journal of Anaesthesiology and Reanimation will not give as much priority to case reports and letters to the editor in the evaluation and publication process. Before submitting your manuscript, please take this into account.

The target audience of the journal includes specialists and medical professionals working in the fields of anaesthesiology, intensive care, and pain therapy.

The editorial and publication processes of the journal are shaped in accordance with the guidelines of the International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Council of Science Editors (CSE), Committee on Publication Ethics (COPE), European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal is in conformity with the Principles of Transparency and Best Practice in Scholarly Publishing (doaj.org/bestpractice).

The Turkish Journal of Anaesthesiology and Reanimation is indexed in PubMed Central, Web of Science-Emerging Sources Citation Index, TUBITAK ULAKBIM TR Index, EMBASE, Scopus, EmCare, CINAHL and ProQuest.

Processing and publication are free of charge with the journal. No fees are requested from the authors at any point throughout the evaluation and publication process. All manuscripts must be submitted via the online submission system, which is available at www.turkjanaesthesiolreanim.org. The journal guidelines, technical information, and the required forms are available on the journal’s web page.

All expenses of the journal are covered by the Turkish Society of Anaesthesiology and Reanimation. Potential advertisers should contact the Editorial Office. Advertisement images are published only upon the Editor-in-Chief’s approval.

Statements or opinions expressed in the manuscripts published in the journal reflect the views of the author(s) and not the opinions of the Turkish Society of Anaesthesiology and Reanimation, editors, editorial board, and/or publisher; the editors, editorial board, and publisher disclaim any responsibility or liability for such materials.

You can find the current version of the Instructions to Authors at: https://turkjanaesthesiolreanim.org/en/instructions-to-authors-1029.

All published content is available online, free of charge at www.turkjanaesthesiolreanim.org.

The Turkish Society of Anaesthesiology and Reanimation holds the international copyright of all the content published in the journal.

An Open Letter to Young Anaesthesiologists
Shibu Sasidharan, Harpreet Singh Dhillon
Dear Colleagues,

The Coronavirus 2019 (Covid-19) pandemic has changed our personal and professional worlds in unimaginable and unprecedented ways, with dramatic consequences worldwide in the economic, financial, social, health, and scientific fields. Anaesthesiology, reanimation and intensive care specialists have become frontline specialists in an unusual infectious disease environment, operating in the operating room, intensive care unit, emergency response, and team leaders.

We have not been accustomed to our new profession, which involves excellent clinical uncertainty and potential personal hazards. Although the chaotic environment has calmed down a bit, we still do not know what will happen in the future, and we think that we should be prepared for anything at any moment.

Published articles and case reports allowed us to increase our understanding of the pandemic and provide better treatment to our patients. To not delay the publication of the papers accepted by our journal about Covid-19 and to contribute to the scientific world, it was suggested to the TARD board of directors to issue an additional issue by the editors of the TJAR journal. This supplementary issue contains 10 original articles, 2 case reports and 3 letters to the editor about the Covid-19 pandemic.

Despite the uncertainties created by the Covid-19 pandemic, we will inevitably walk in the light of science.

Respectfully yours,

Prof. Dr. Necati Gökmen
On behalf of the editorial board
