

Supplementary Figure S1. Patient-level Spearman correlations using mean values across T2-T4 (n = 24). (A) Mean VAS-A vs. mean VAS: r=+0.451, *P*=0.027. (B) Mean VAS vs. mean ANI: r=-0.225, *P*=0.291. (C) Mean VAS-A vs. mean ANI: r=-0.405, *P*=0.050. Each dot represents one patient. Dashed lines indicate Spearman regression fits.

VAS, Visual Analogue Scale (pain); VAS-A, Visual Analogue Scale for Anxiety; ANI, Analgesia Nociception Index.
